

## **V6 EMBROIDERY SOFTWARE**

# **BERNINA+**

### **JULY 2009 INFORMATION**

- Thumb nail view when opening designs
- Auto Scroll - customizable (when scrolling it zoomed in and out on the design)
- Font view - when you type in the name you will see the name beside the font in the preview section - You can even see a preview of the True Type fonts!!!
- Letter manipulation
- Lift letter off base line
- Improved Color Film display
- Automatic buttonhole spacing (object spacing to follow)
- Color wheel
- Free hand embroidery (open & closed) with edit and backspace - you could use a drawing tablet for this.
- Automatically add outlines to designs and lettering
- New fills and effects (stipples/ripples/waves)
- Morphing of an image
- Carving stamps - many shapes (cut out and raised)
- Split objects for multiple hoopings
- auto digitizer adds outlines and borders
- Quilter Program updated - new diamond layout and block editor
- Corel Essentials graphic editing within the software. Everything is still within one program!!!

Make sure to attend our Software Sampler class. There will be sneak peaks of V6 in each session.

Many more features! We will be attending the official training in August - so, we will have more info then.
